Ambitious AI Engineer with strong expertise in Generative AI, Machine Learning, Data Engineering, and Full-stack Software development. Proficient in Python, PyTorch, TensorFlow, Scikit-learn, and advanced AI tools such as LangChain, LlamaIndex, Hugging Face Transformers, and OpenAI APIs. Skilled in building agentic AI systems, Retrieval-Augmented Generation (RAG) pipelines, prompt engineering, and designing scalable data pipelines. Experienced in integrating AI into production-ready applications with real-world impact.

Skills

Languages : Python (3yrs), JavaScript (3yrs), Java (2yrs), TypeScript(2yrs), SQL(3 yrs), Go(1 yr)
Frameworks: FastAPI (3 yrs), Django(2yrs), Flask (2yrs), React (3yrs) , Next.js(2yr), Svelte(1yr), &Angular(1yr)
AI/ML: TensorFlow, PyTorch, scikit-learn, Langchain, LlamaIndex, OpenCV, NLTK, Transformers & Streamlit,
DevOps & MLOps: Docker, MLFlow, DVC, Apache Airflow, Apache Kafka,
Databases: MongoDB, PostgreSQL, MySQL & Vector DBs Cloud computing: AWS & Azure
Technical skills : Prompt Engineering, Computer vision, CNN, RNN, EDA, NLP, CI/CD, n8n, LangGraph & Langflow

Education

Bachelor of Science in Information Systems - Addis Ababa University, Addis Ababa, Ethiopia

Graduated: July 2023

- Relevant Coursework: Fundamentals of Programming, Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Database Management Systems (DBMS), Applied Mathematics, Statistics, Information Security, Artificial Intelligence (AI), Data Science and Analytics, Enterprise Resource Planning (ERP) Systems

Work Experience

Founding AI Engineer - Chronos - San Francisco, California - June 2025 - Present

- Designed and built Chronos' AI financial advisor, integrating NLP and recommendation models for personalized finance insights.
- Developed and deployed AI-driven investment strategies (crypto, stocks, and NFTs) to support automated wealth management.
- Architected multi-currency account infrastructure enabling seamless transfers, exchanges, and portfolio management.
- Implemented AI-powered smart spending tools, improving user financial tracking and bill payment efficiency.

Software Engineer - Bluespark Business Technology plc - Addis Ababa, Ethiopia - February 2025 - June 2025

- Developed a scalable, customizable Sales Force Automation System using FastAPI, PostgreSQL, and Svelte.
- Engineered reusable API endpoints and modular frontend components with OpenAPI/Swagger, TailwindCSS, and DaisyUI, reducing feature development time by 40%.
- Streamlined the company's manual sales tracking and reporting process, improving operational efficiency by 60% and cutting data entry errors by 70%.

Generative AI Engineer - 10 Academy - Santa Clara, California (Remote) - April 2024 - October 2024

- Engineered scalable data warehouses for LLM fine-tuning, utilizing web-scraped data to improve data processing & analysis efficiency by 25%.
- Designed and deployed an automated advertising storyboard generation system, enhancing creative output for marketing campaigns.
- Developed a high-precision legal expert RAG system using advanced NLP, reducing contract Q&A time by 40%.

Software Engineer - Ministry of Innovation and Technology - Addis Ababa, Ethiopia -November 2023 - December 2024

- Built a SaaS document management system with e-signatures, boosting efficiency by 30% and cutting approval time by 40%.
- Developed a startup community platform uniting stakeholders in Ethiopia's innovation ecosystem—featuring startup/investor profiles, forums, event listings, job boards, and resource hubs to foster collaboration and access to funding.
- Improved internal security by monitoring traffic, setting firewalls, and training staff—cut system downtimes by 30%.

Projects

- **Scalable Data Warehouse for LLM Fine-tuning (~80h) 🔗** : Optimized Amharic NLP models with Airflow, Faust, & Docker, increasing sentiment analysis accuracy by 30% and improving pipeline efficiency by 40%, achieving 90% uptime for consistent service delivery.
- **Automated Storyboard Synthesis for Digital Advertising (~60) 🔗** : Leverages NLP and machine learning to reduce storyboard creation time by 50%, integrating visual processing to increase client engagement by 20% and streamline project workflows.
- **Legal Expert Contract Advisor RAG (~60) 🔗** : Developed a RAG system using Python, Langchain, OpenAI GPT, and Weaviate, enhancing legal document analysis and API deployment for efficient contract review.
- **Crypto trading Engineering (~80) 🔗** : Built an automated crypto back-testing platform, boosting price prediction accuracy by 25% with time-series forecasting, and improving trading profit by 40% with optimized risk management strategies.
